

Get Your Updated COVID Vaccine

Updated vaccines are now available to help protect against Omicron.

For the best protection, get your updated vaccine.

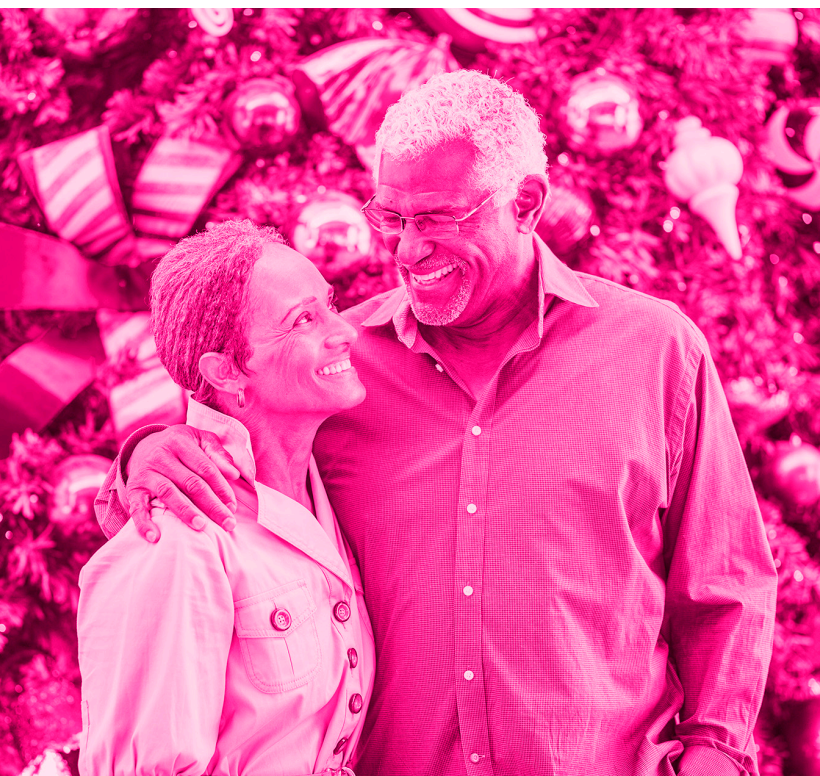

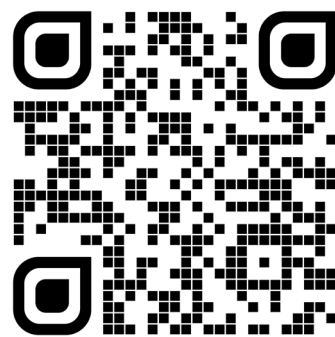

Get your updated vaccine now if your last dose was before September 2022 (October 2022 for kids 6 months - 11 years). Otherwise, wait until 2 months after your primary vaccination series is done.

Completing your primary vaccination series means you got 2 shots of the Pfizer-BioNTech, Moderna, or Novavax vaccine, or 1 shot of Johnson & Johnson's Janssen vaccine. Children 6 months - 4 years who got all 3 doses of the Pfizer-BioNTech primary vaccination series don't need an updated vaccine at this time.
