## To Prevent Getting Very Sick From COVID, Timing Is Everything

Staying up to date with your COVID vaccine is the best way to protect yourself from getting very sick from COVID. But the FDA has authorized or approved treatments to help prevent severe illness in people who are more likely than others to get very sick from COVID despite vaccination.

## You're more likely to get very sick from COVID if any of these apply to you:

- You're 50 or older
- You have a compromised or weakened immune system
- You have one or more health issues, such as severe asthma; diabetes; obesity; or chronic heart, lung, or kidney conditions

## WINDOW FOR STARTING ANTIVIRAL PILLS Day 6 Day 1 Day 2 Day 3 Day 4 Day 5 Too late to start **COVID** symptoms treatment start WINDOW FOR STARTING ANTIVIRAL INFUSION Day 5 Day 6 Day 3 Day 4 Day 1 Day 2 Day 7 Day 8 **COVID** symptoms Too late to start treatment start

## For any of the treatments to work, you must begin taking them within days of when your COVID symptoms start.

Even if your symptoms are mild, treating your COVID early with medicine prescribed by a doctor or other authorized health care provider can make your infection less severe and help keep you out of the hospital. It could save your life.
